EDUCATION

Queen's University

Kingston, ON

Bachelor of Computing with Professional Internship, Software Design Specialization September 2021 – April 2026

Languages: TypeScript/JavaScript, Python, Java, C#, C — **Frameworks:** React, Angular, Django, Firebase

Databases/Tools: MongoDB, PostgreSQL, Docker, Git, Selenium, Auth0, Ghidra, Jadx

EXPERIENCE

Software Developer Intern

May 2024 – June 2025

Centre for Advanced Computing

Kingston, ON

- **Kingston Health Sciences Centre Dashboard** | *MongoDB, Express.js, React, Node.js, Chart.js*
 - * Developed and maintained a clinical analytics dashboard to monitor contamination rates and perform statistical analysis on patient data
 - * Optimized data retrieval and rendering pipelines, reducing dashboard load times from 12s to 2s through indexing and efficient query design on 800k+ records
 - * Implemented interactive Chart.js visualizations to surface contamination trends, anomalies, and actionable insights in blood sampling data
- **WEMA Inc** | *Flutter, Dart, Django, Python, PostgreSQL*
 - * Managed a cervical cancer analysis tool used in Rwanda, Tanzania, and Kenya for communities with little access to modern devices and hospital infrastructure
 - * Deployed fixes for a mobile application powered by a Django backend that serviced 3000 unique clients
 - * Responsible for creating multiple data analysis forms used for identifying preliminary cervical cancer at risk patients

Data Quality Intern

May 2023 – November 2023

Cohere

Toronto, ON

- Labelled, ranked, audited, and corrected machine learning data
- Recommended optimization opportunities for over 400 AI generated prompts daily
- Resolved, troubleshooted, and assessed programming issues in Python, JavaScript, and JSON in order to provide training data for the Cohere Language Model

Full Stack Developer Intern

April 2023 – August 2023

City of Kingston

Kingston, ON

- **Kingston Locum Doctors Dashboard** | *Angular, Firebase, TypeScript*
 - * Created a scheduling service for locum doctors in the City of Kingston area
 - * Provided a unique, city-specific solution to allow patients to connect with healthcare professionals directly
 - * Utilized Angular-Firebase stack to create secure solution for 20+ different locum doctors

Junior Programs Instructor

May 2022 – August 2022

University of Toronto

Toronto, ON

- Creatively introduced middle school students to different STEM concepts using hands-on, iterative learning
- Assessed and resolved technical and personal issues brought by over 100 students in 8 weeks
- Provided resources for students to further knowledge in AI and Programming

PROJECTS

TV Stream Reverse Engineer | *Ghidra, Jadx, Python/Java*

- Reverse engineered an Android TV streaming application to uncover proprietary API endpoints, authentication mechanisms, and encrypted live stream URLs
- Used Jadx/Ghidra to interpret application binaries into readable Java/C files
- Generalized the reverse engineered protocol into a reusable script capable of interfacing with multiple open-source TV platforms

Diesel | *React Native, Google Maps API*

- Built a cross-platform mobile application that estimates the time and monetary cost of transportation options including driving and public transit
- Integrated Google Maps APIs to dynamically retrieve routing, travel times, and transit alternatives for real-time trip comparisons
- Implemented cost modeling algorithms using fuel efficiency data for 17,000+ vehicle models combined with Ontario fuel price data
